
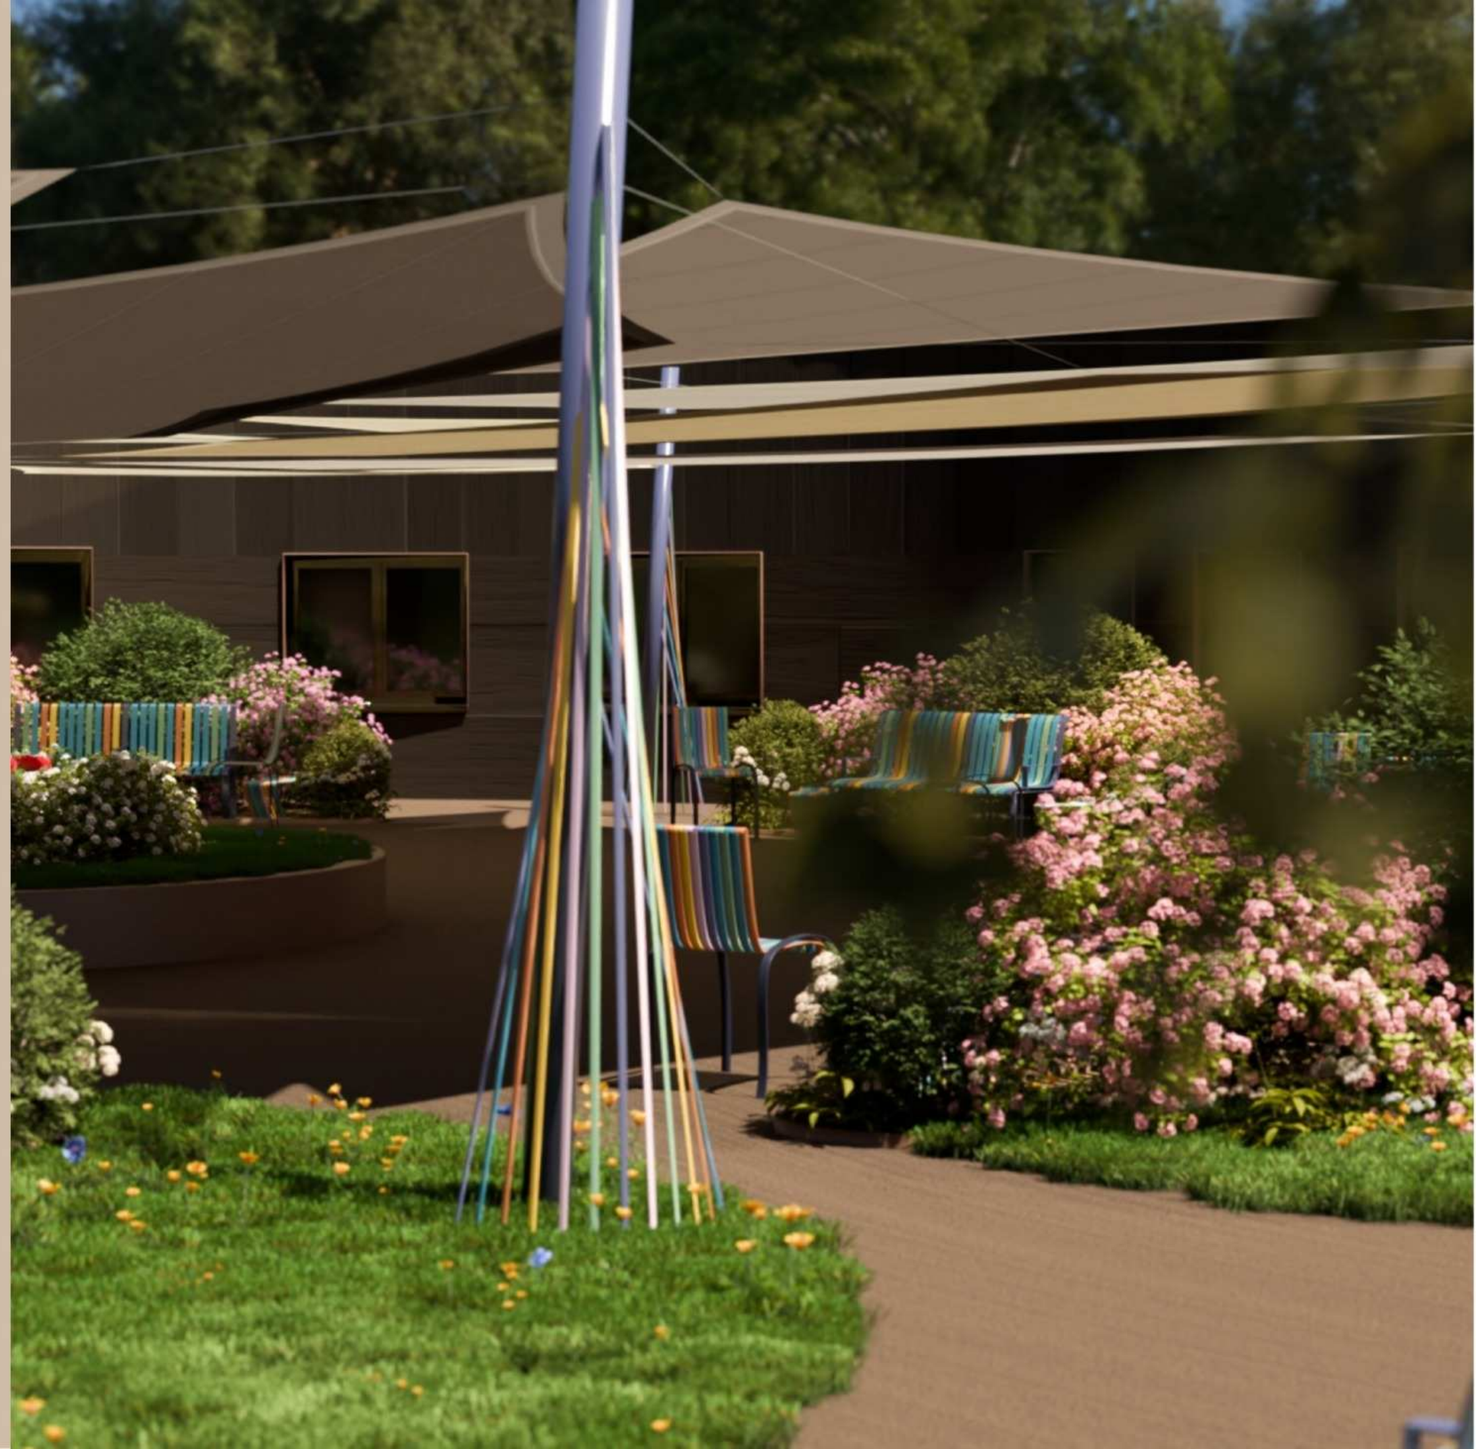
AUGE COLIN
EHPAD

"THE RENAISSANCE OF A SPACE"

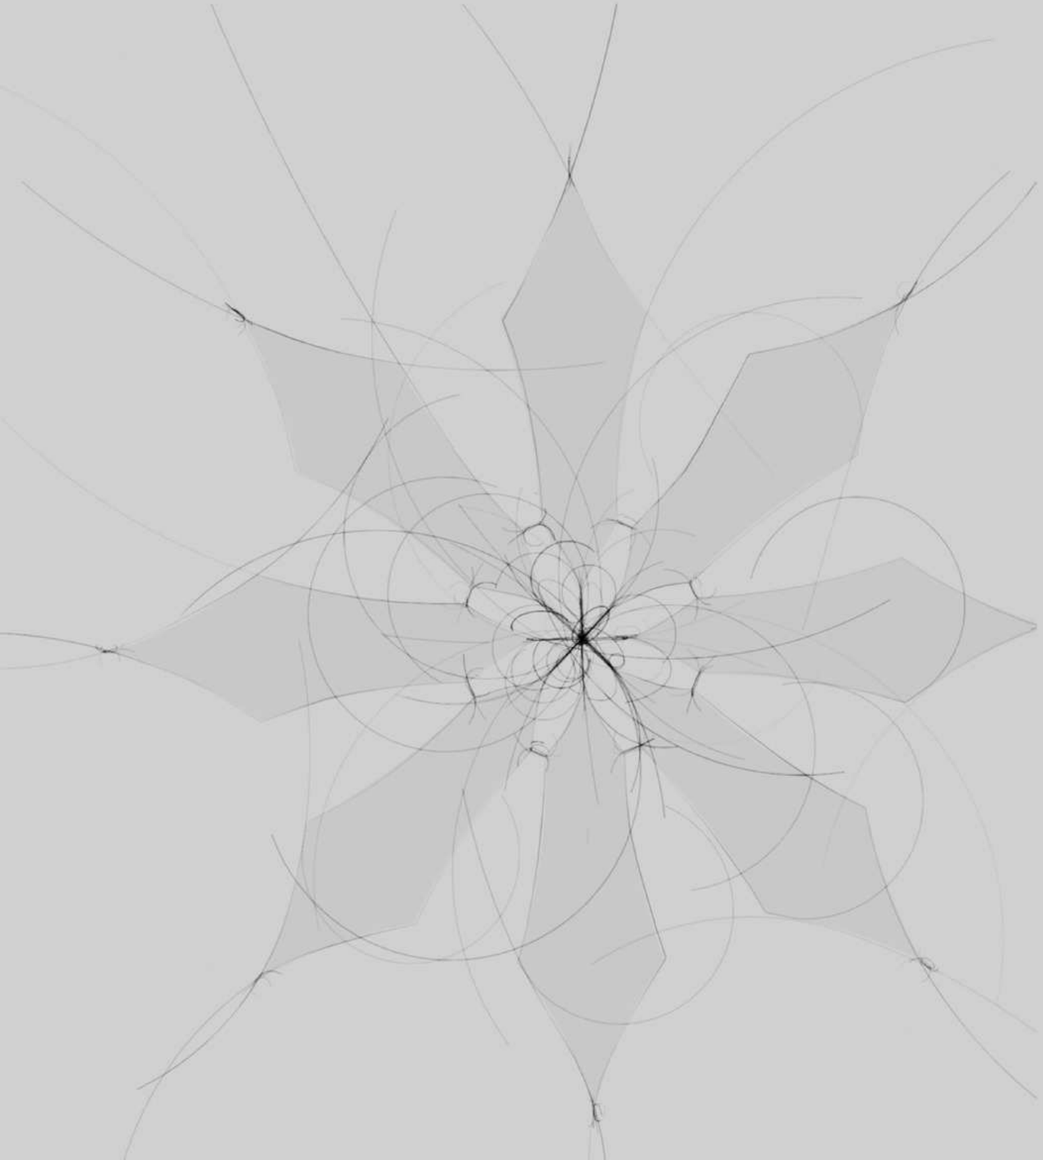
"Architecture is the art of creating emotions in the void"

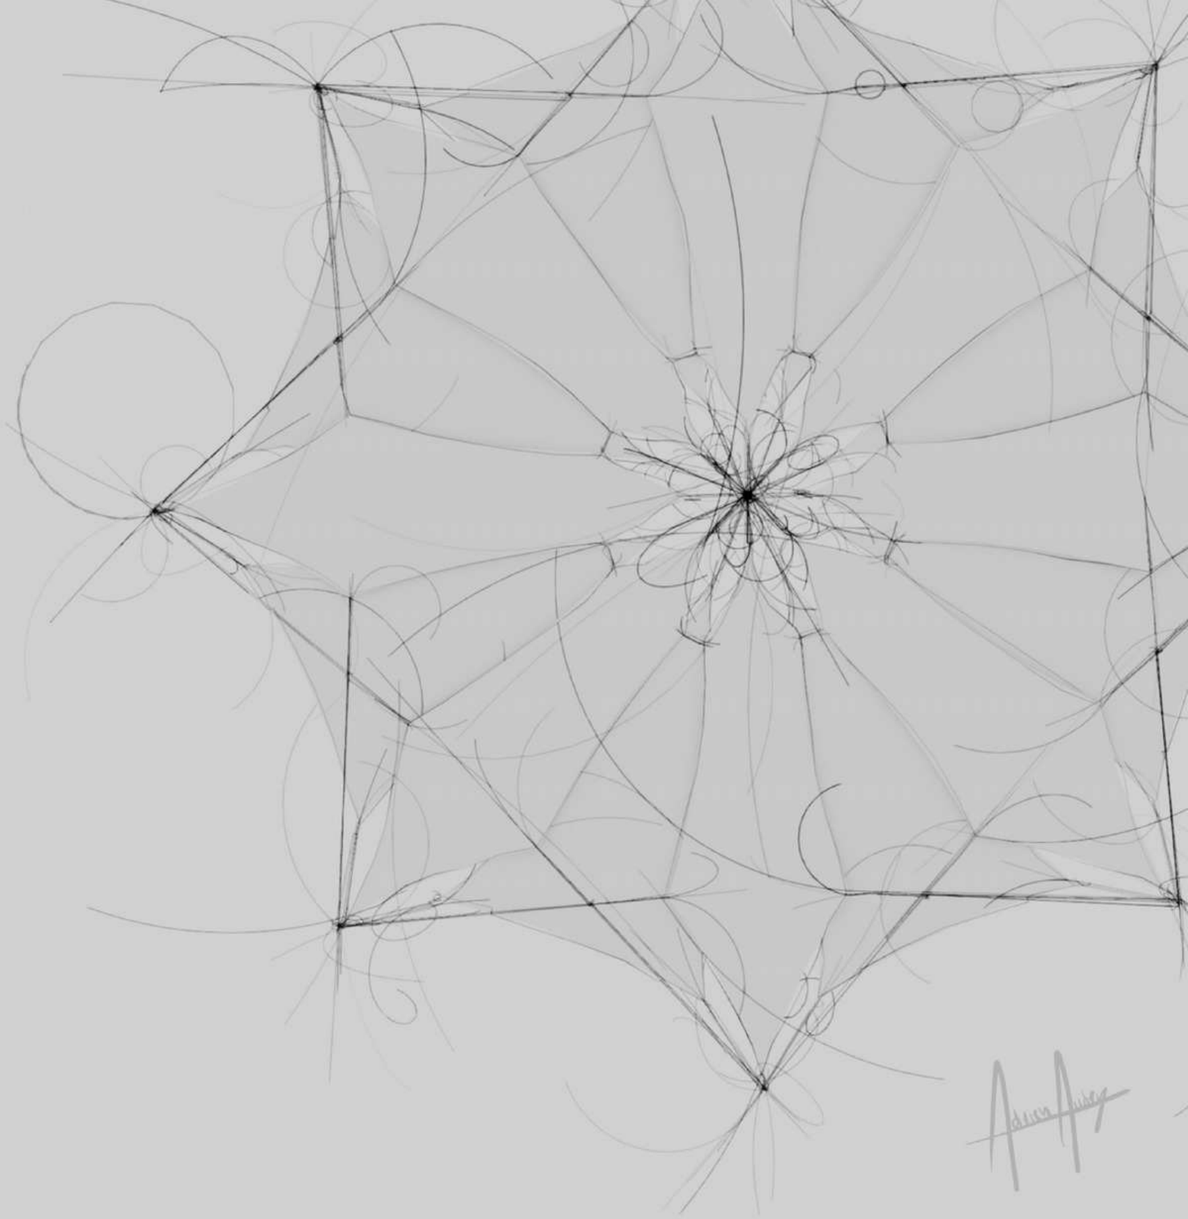
"In the heart of the Champagne region, the Augé Colin care home is reinventing its living spaces. Its central square is transformed into an architectural work where natural light plays with cast shadows. The coloured concrete floor, with a brushed finish, creates a noble and warm setting that anchors the project in a respectful modernity."



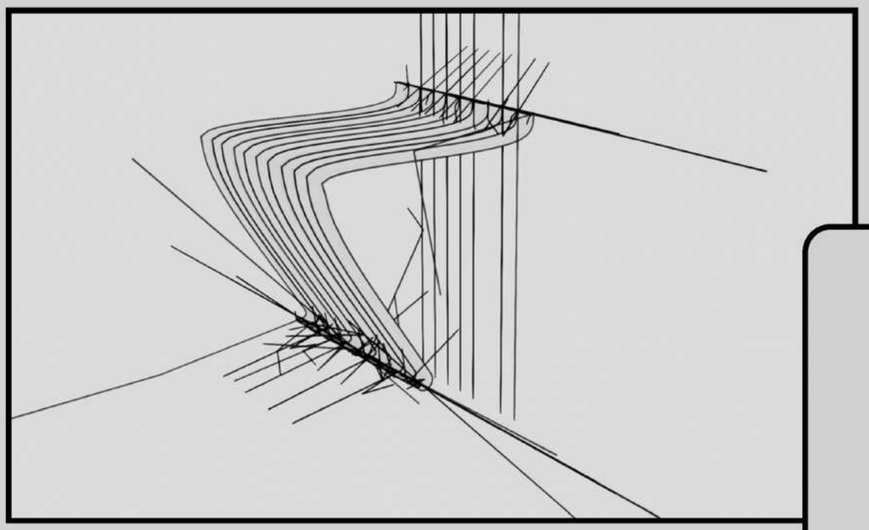
"THE ARTIST'S GESTURE"

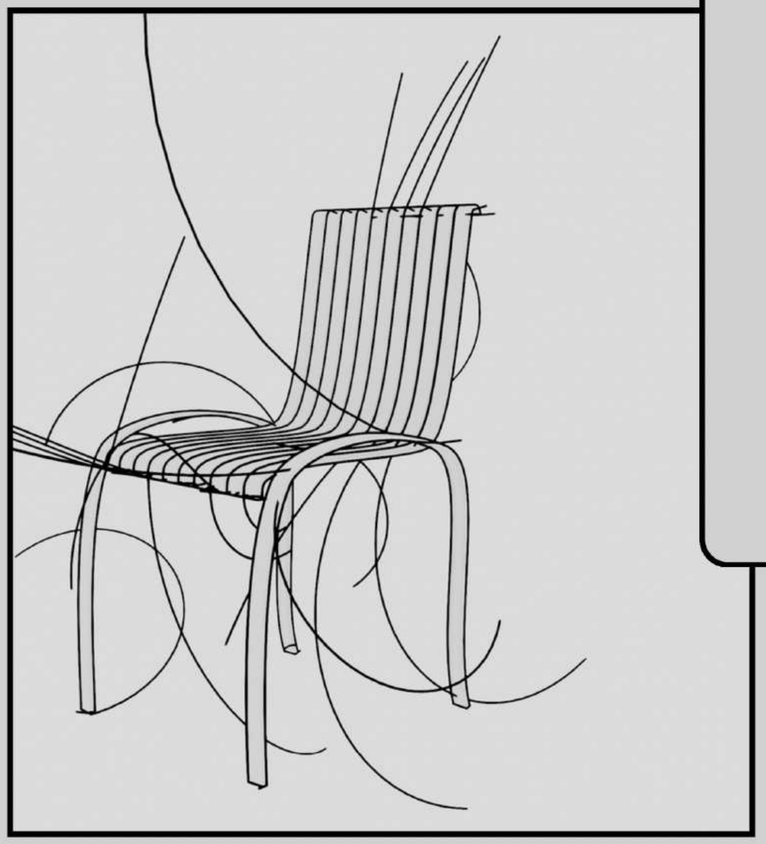
"Design is born when function meets poetry"

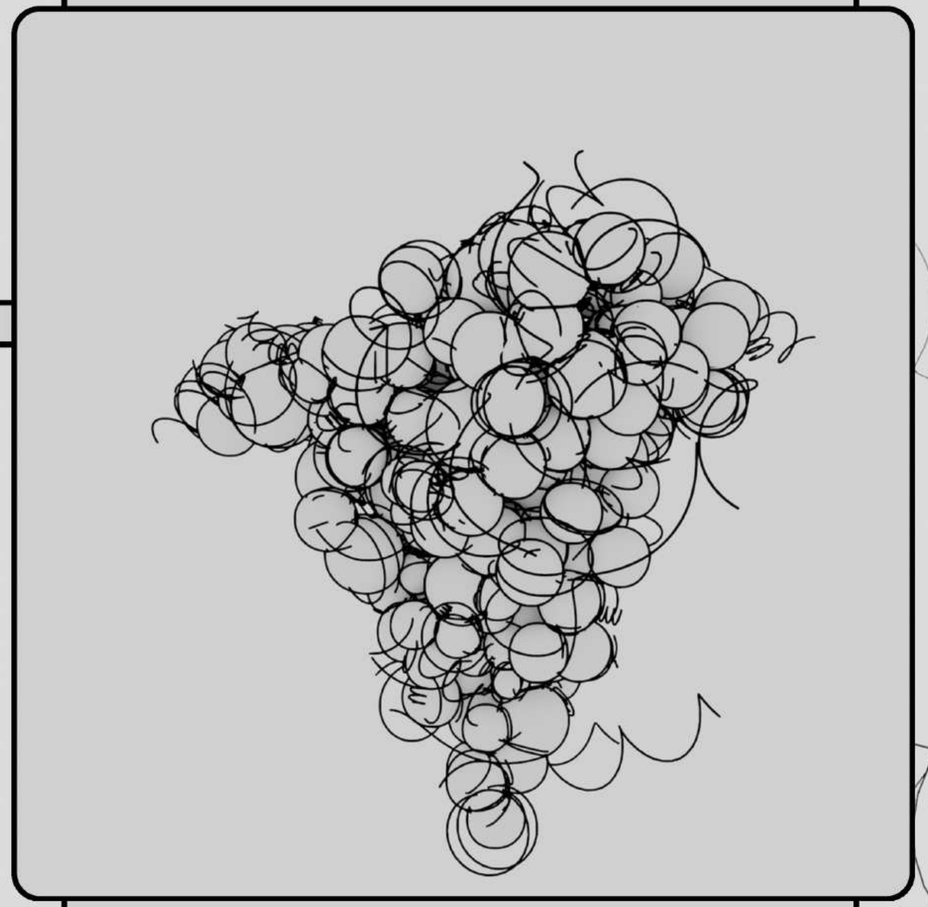


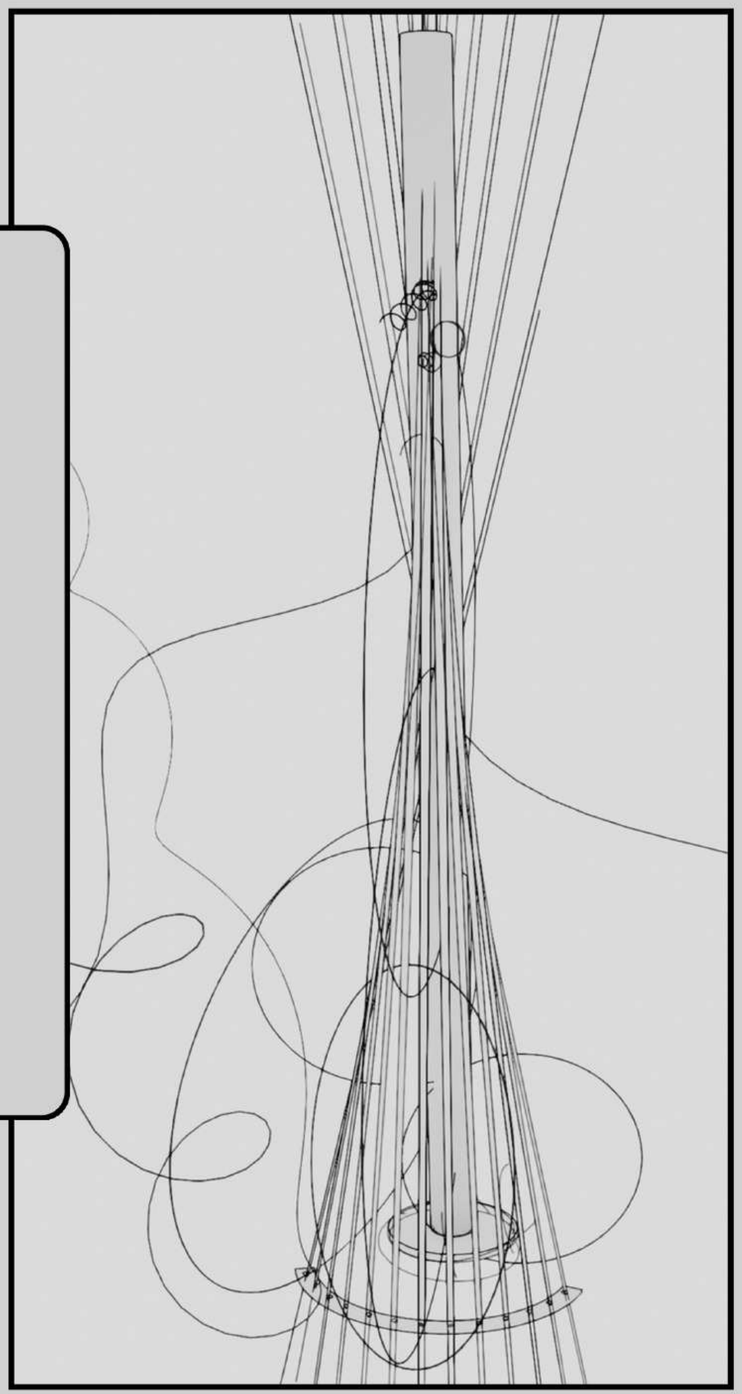


Adrien Audry, an artist-designer renowned for his creation at the Hôtel Royal Champagne in Épernay among others, here elevates the ordinary into the extraordinary. His vision transforms a need for shade into a total work of art in which every element tells the story of the place and its residents. The project transcends its primary function to become a complete sensory experience.



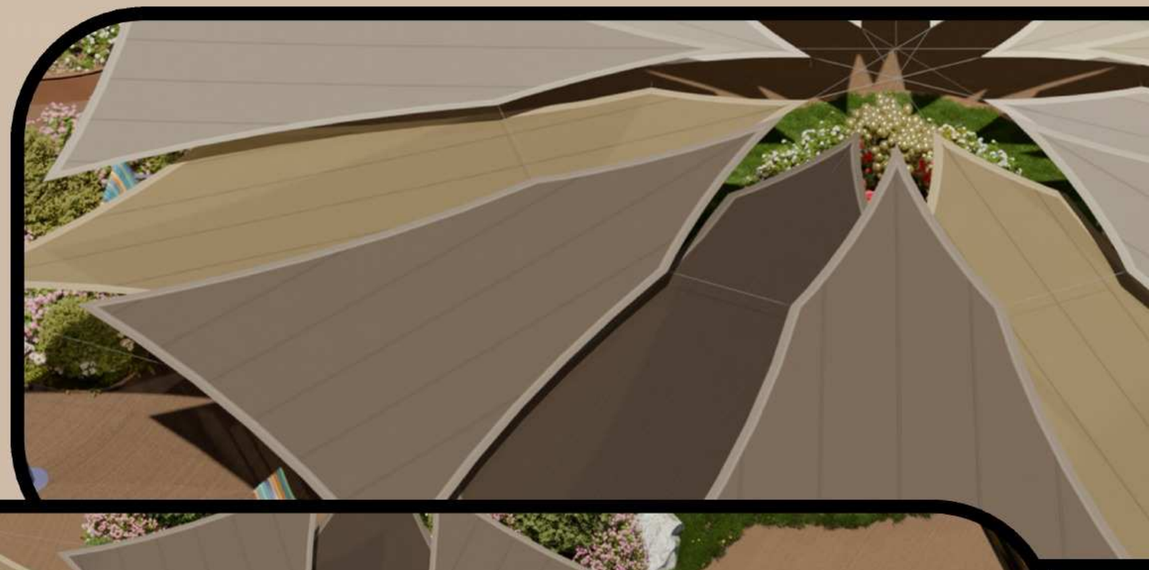


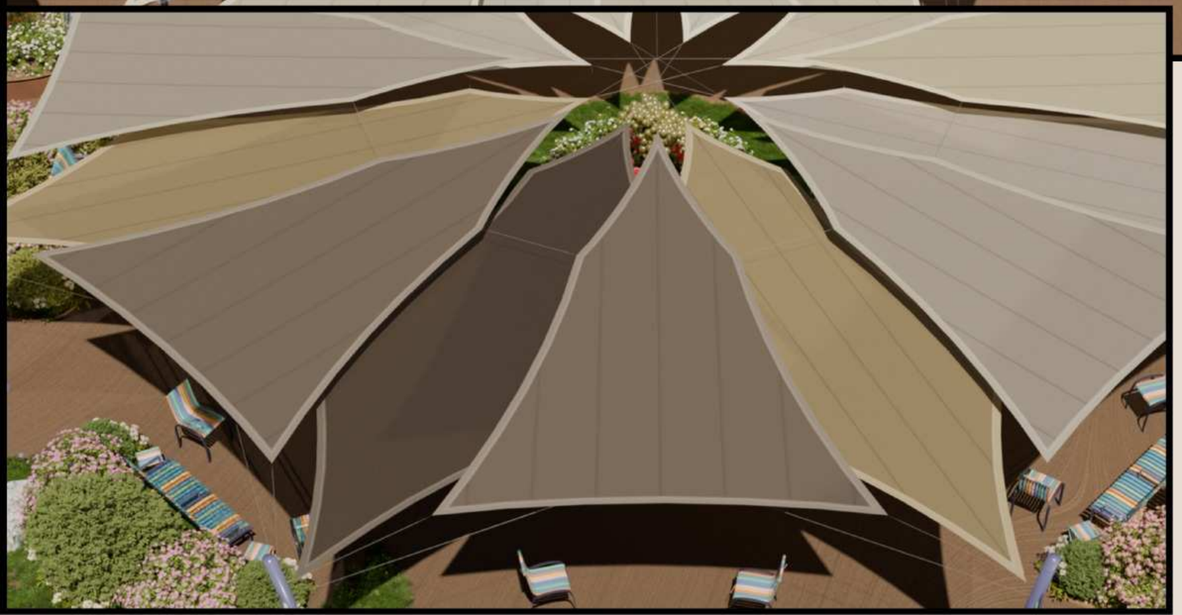


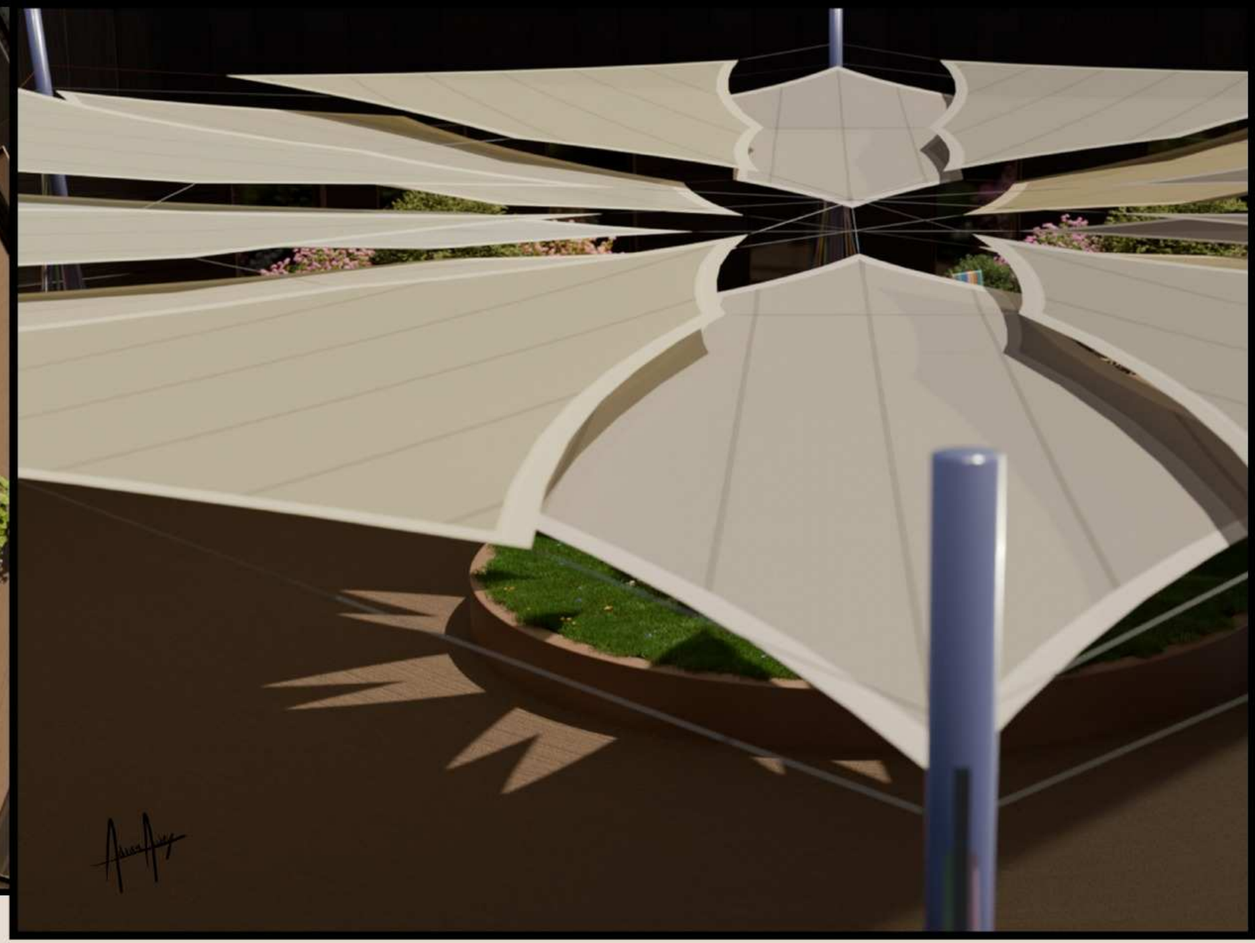


"THE DANCE OF THE SAILS"

"Like the golden reflections of champagne, architecture captures light and turns it into magic"







La place centrale s'anime sous des voiles d'ombrage qui suivent les proportions de Fibonacci. Cette géométrie savante, inspirée des formes naturelles, crée un mouvement perpétuel. Les voiles, dans leurs camaïeux de beige et champagne, dialoguent avec la lumière pour offrir une protection solaire aussi efficace qu'élégante.

TECHNOLOGY AND HARMONY

"Innovation is perfect only when it blends into use"

The micro-perforated membrane, chosen for its exceptional technical qualities, offers a living shade comparable to that of a natural canopy. This feat blends seamlessly into the overall composition, creating a pleasant microclimate that invites contemplation and sharing.

THE GOLD OF CHAMPAGNE

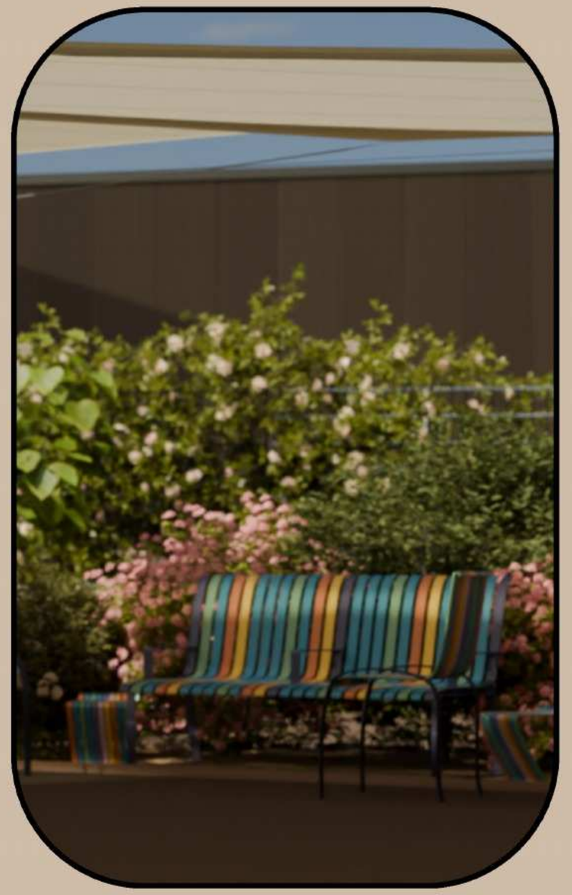
"In every bubble of champagne dances the spirit of a terroir"

At the centre of the composition rises a golden sculpture that captures the essence of Champagne. This monumental Chardonnay grape cluster becomes the focal point of the space. It evokes both the bubbles rising from the bottom of a flute and the noble fruit that made the region famous.

SYMPHONY OF COLOURS

The natural-toned sails converse with the existing multicoloured benches, creating a living chromatic score.

This harmony of colours is enriched by flower beds where red roses, a tradition of the Champagne vineyards, add their vibrant notes.



"COLOUR IS THE HUMAN TOUCH
OF ARCHITECTURE"

LIVING SPACES

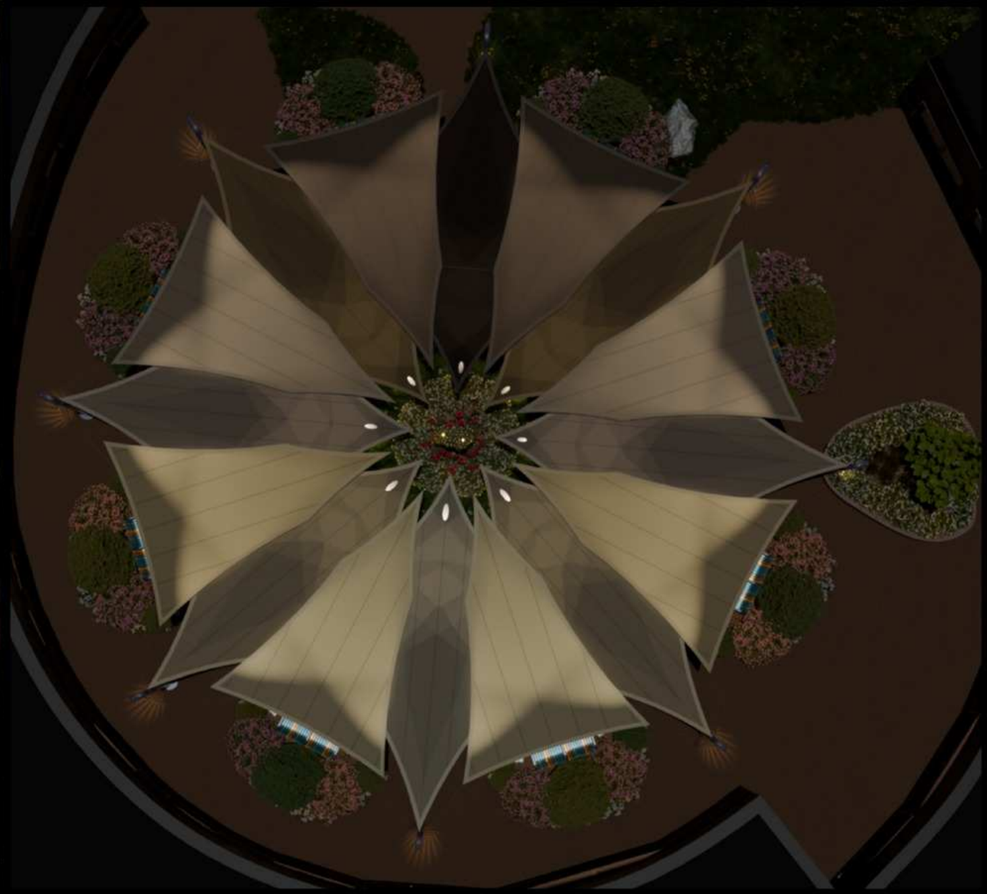
"True luxury lies in the quality of shared moments"

Eight intimate alcoves unfold around the square, each conceived as an open-air lounge. The furniture, designed specially for the project, invites conviviality. Each ensemble forms a theatre of life where bonds are woven between residents and visitors.

"A garden is a fragment of dream entrusted to the earth"

THE GARDEN OF THE SENSES

"NOCTURNAL LIGHTS"

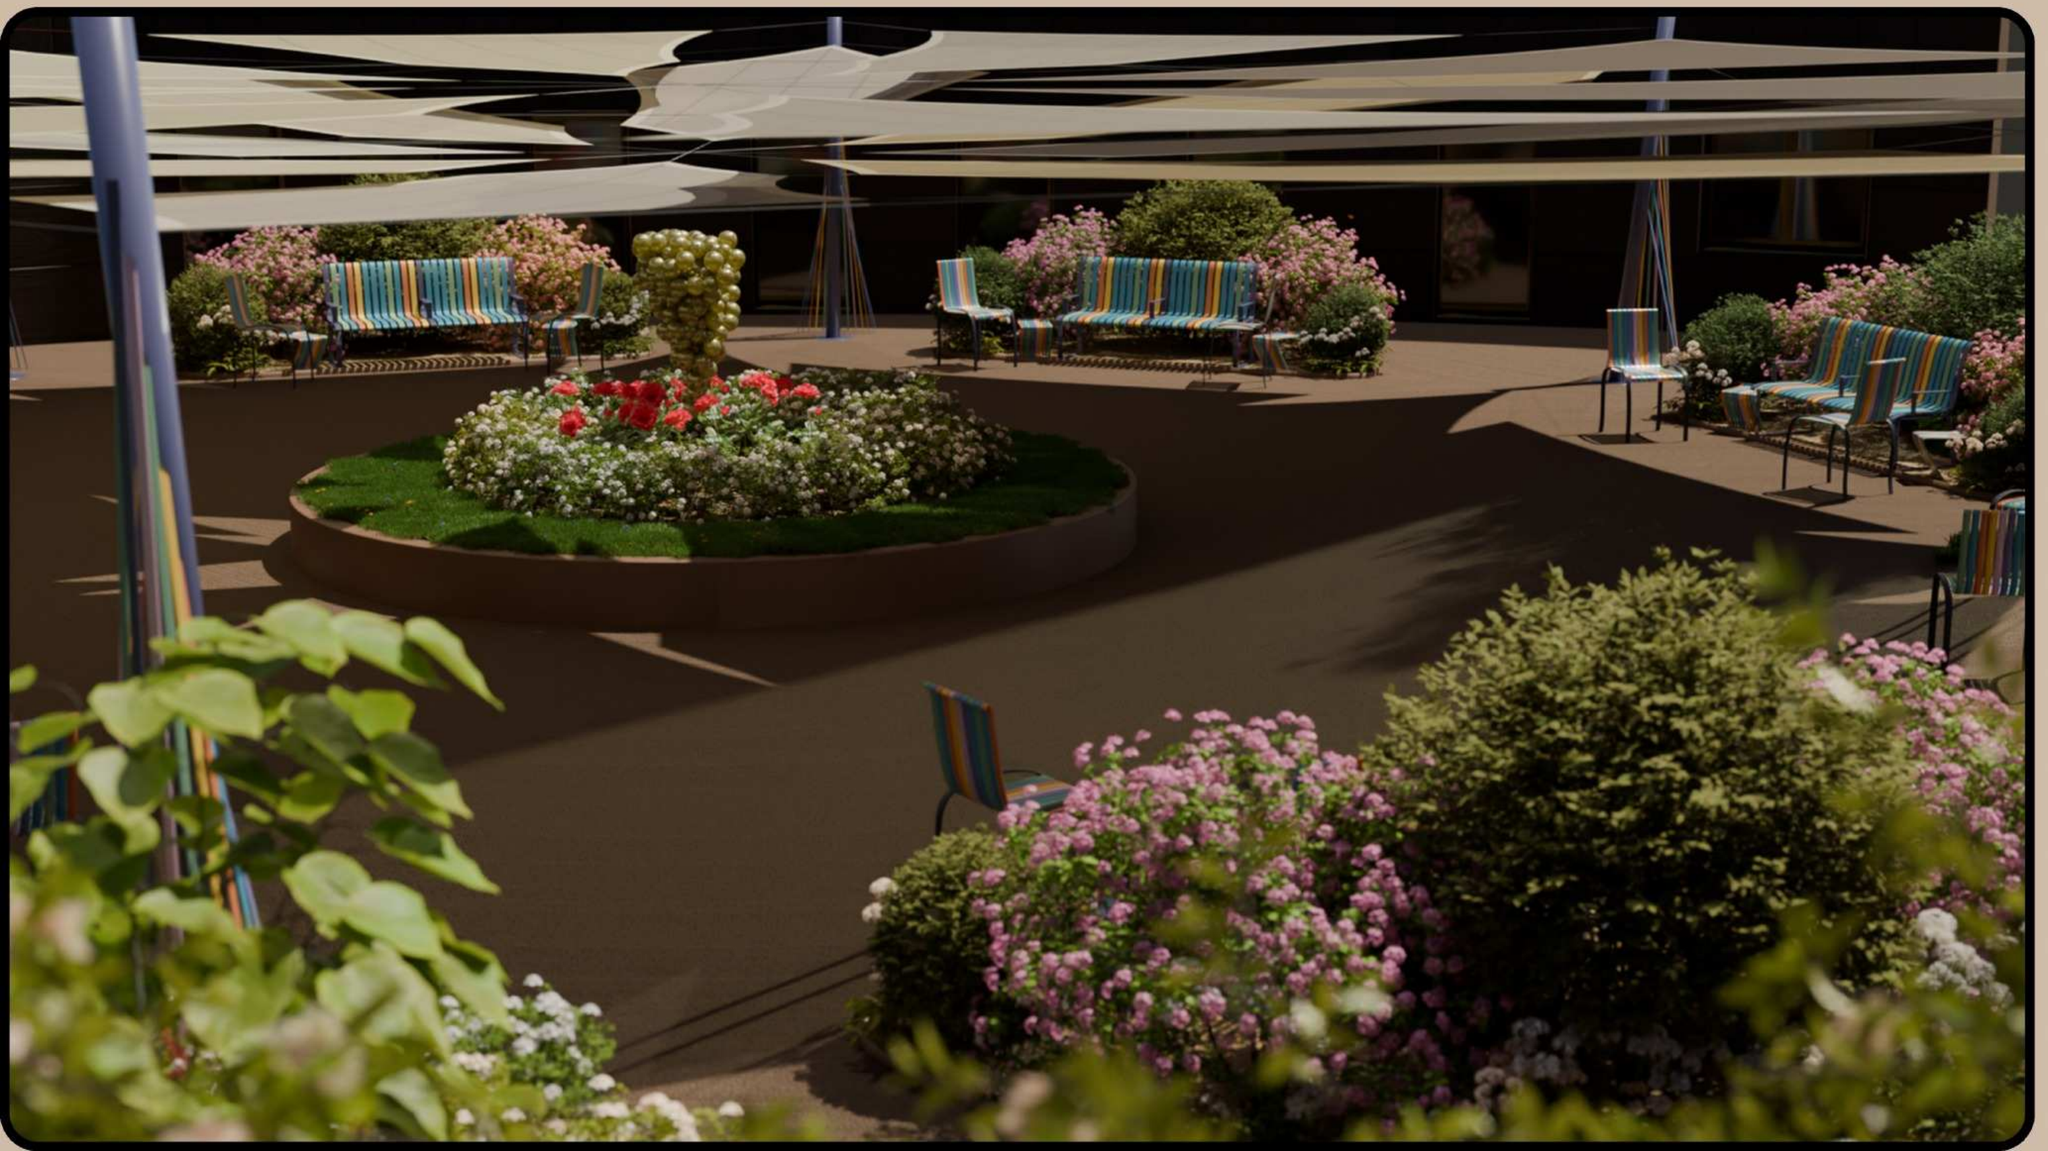


"Night reveals another facet of architecture"

In the evening, the space metamorphoses. The golden grape cluster lights up like a constellation, while the sails delicately catch the light. The benches, highlighted by soft lighting, trace luminous paths that invite a stroll.

THE ART OF LIVING TOGETHER

"Successful architecture is the kind that makes us forget it exists"



This reinvented square becomes the beating heart of the establishment. It naturally extends the village spirit of the interior, where the shops and trompe-l'œil façades already tell a story of conviviality and sharing.

A SIGNATURE FOR THE FUTURE

This creation signed by Adrien Audry transcends its primary function to become a true work of social art. It celebrates the Champagne art of living while offering residents an exceptional living space where every detail contributes to collective well-being.

"Beauty is the promise of happiness"
